Caution External Email

> **Caution:** This email originated from outside of the organization. Only open attachments and links you trust, for more information and tips: https://olink.pw/external

What is this?

This is simply a easy visual warning to let you know that this email came externally, meaning that it didn't come from anyone inside your organization and if anyone is claiming to be from your company to get more information or attempt to get you to do something you shouldn't, you would easily able to tell that the server detected that this didn't come from anyone on your team or inside your company.

If someone is claiming to be someone inside your company, please report the email by following these steps: I got a suspicious ema... | Docs - Precision Computer

What do I do with this?

Just take a moment to pause and make sure that the person emailing you is authorized to get the information you may reply with, and that it is the intended recipient. Unfortunately, there are many scammer and hackers that will try to deceive the spam filters and you into trusting them.

Please review how to identify emails for Scams: I got a suspicious ema... | Docs - Precision Computer
